## Rep Tryout Policy - Player with a Medical Exemption

This policy provides information for players who are unable to participate in NVMHA Rep Tryouts due to a documented medical illness or injury.

A player wishing to tryout for Rep hockey with NVMHA, who has a documented medical condition, injury or illness, that prevents them from participating in tryouts must notify the Director of Player Relations and Registrar in order to be categorized “*absent with medical permission*” for any portion of the Rep tryouts. The player must present a signed doctor’s certificate that states the nature of the illness or injury and estimated rehabilitation time. Original medical certificates must be presented to the Director of Player Relations as follows:

1. prior to the first day of tryouts, if the injury/illness occurs prior to tryouts; or
2. prior to the next scheduled tryout session if the injury or illness occurs during tryouts.

In addition, a player who is *absent with medical permission* must provide a weekly status report by email to **Director of Player Safety** – [player@nvmha.com](mailto:player@nvmha.com). Once a player is medically cleared to return to hockey, the Director of Player Relations will arrange to have the player to return to evaluations as follows:

1. a player with a recent history of playing Rep hockey will return to is the A2 work group / team for further evaluation.
2. a player with no recent history of playing Rep hockey will be assigned to the A3 work group / team for evaluation.

Players who fail to provide documentation of medical illness / injury or who fail to report weekly to the Director of Player Relations may forfeit their tryout.
